Basin. The six bamboo rafts [REDACTED] are [REDACTED] agricultural storage tanks probable associated with the Havana sugar mill located at UTM coordinate 320470. In late [REDACTED] a large AAA training site was located at UTM coordinate 310470 (See Figure 1) which may account for the security and the military activity in this area. The six bamboo rafts were not observed on any of the coverage. On aerial photography of [REDACTED] an underwater net was located at UTM's 31704700 to 31904700, a underwater cable at UTM's 32114700 to 32104700, and two underwater cables at UTM's 32184700 to 32224700 (See Figure 1). The net and cables were not observed on aerial photography of [REDACTED] (See Figure 2) (probably due to obliquity of photography).
